

CommentsA1.docx ... will be in other.zip

1. a1 was dry run, no "real" deductions
2. Seasonal component remains in monthly series being used by some students. Later may want to add versions of series with seasonal component removed.
3. If want to add series later in course, can splice in within Matlab (if Matlab-savvy) or simply repeat steps you took when first running geosa1
4. For those using monthly data, in describing, should specify month/year that month #1 corresponds to. Should specify the "span" of the time series.
5. Be sure text box includes all captions (may need to tug box)
6. Some people seem to have acrobat reader restriction on commenting? mac-dependent?, version-dependent? Googled and got following:

"Please try disabling Protected Mode under Edit> Preferences> Security (Enhanced) and uncheck 'Enable Protected Mode at startup' option. Let me know if this helps." -- answer: it did not help

"Hey Everyone you can just go and select prepare form on the right side instead of clicking comments and then you can add comments. thanks"
