

Tues 1-15-19

- 1. Examples of time series**
- 2. V1, V2 and V3 data**
- 3. Some online sources of data**
- 4. Software needed in course**
- 5. Targets:**
 - Matlab installed 1/17**
 - Time series gathered 1/24**

V1, V2, V3 time series

Nominal “causal” system

Example 1

V2

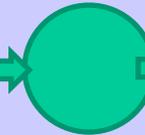

V1

Precipitation

x_t

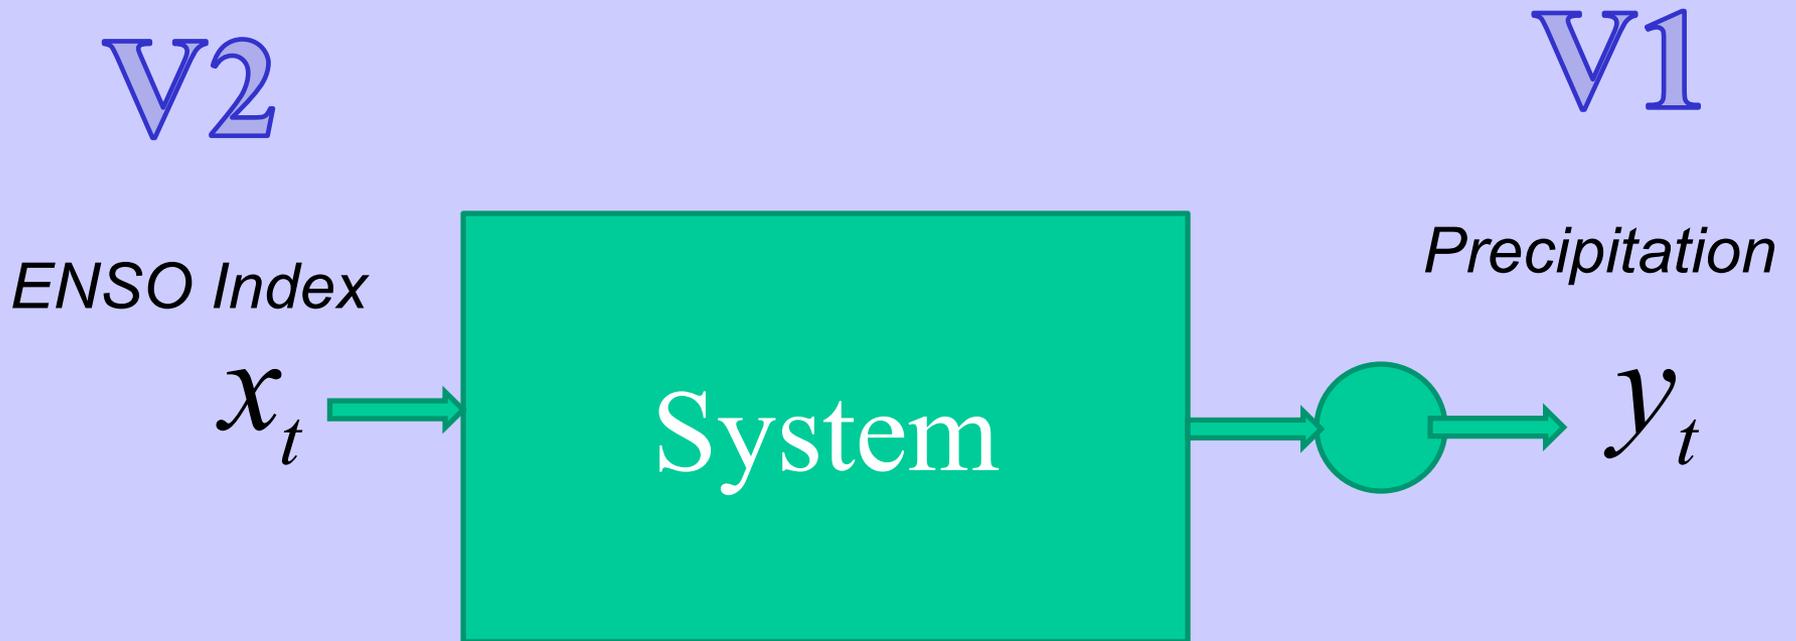

System

*Tree-ring
Index*

y_t

Example 2

Example 3 (“nominal” system)

V2

V1

$\delta^{18}O$

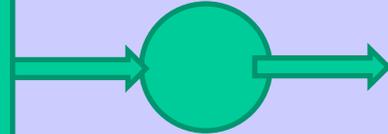

$\delta^{13}C$

ice core

ice core

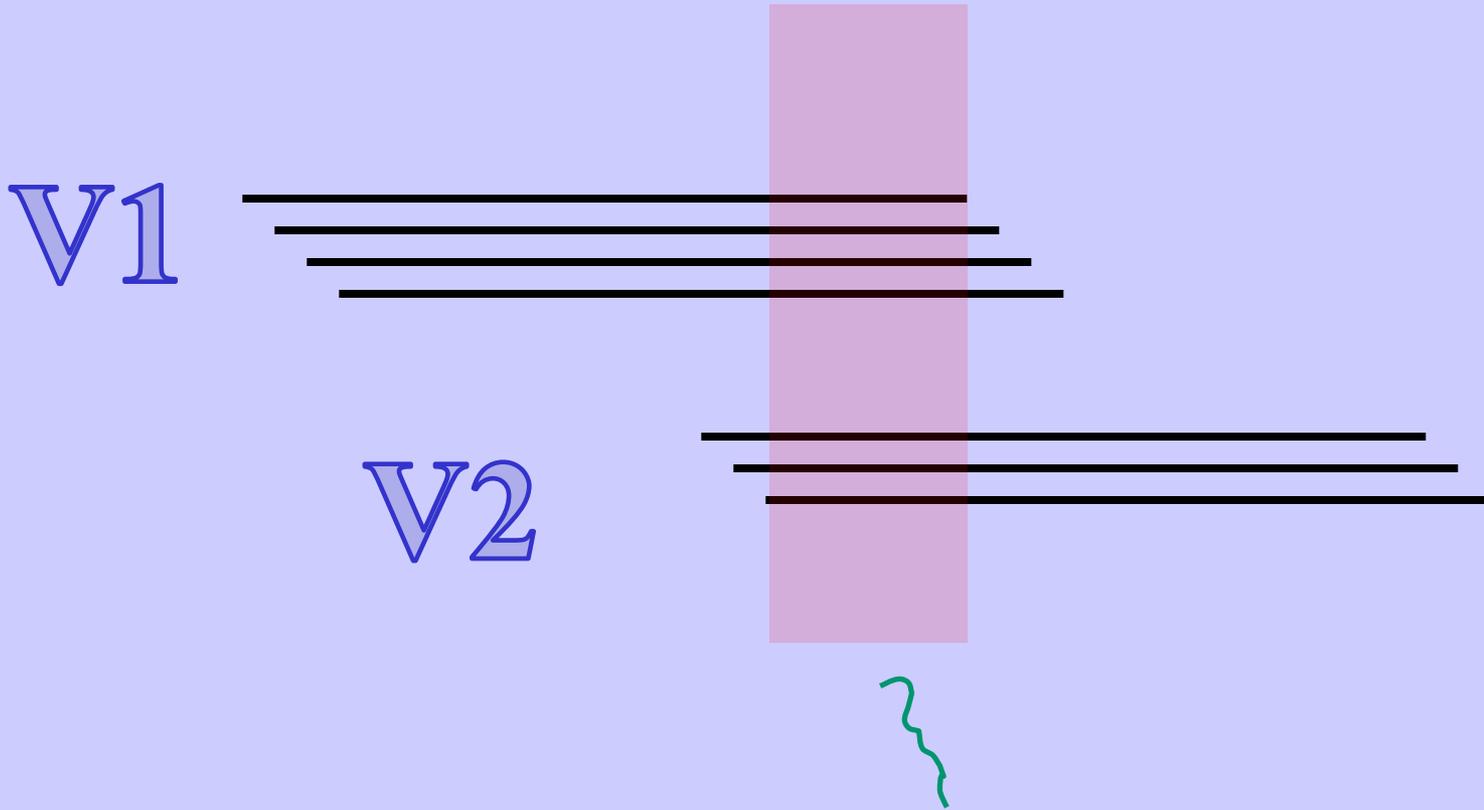

x_t →

System

y_t

Series Overlap (V1 & V2)

>30 observations; >50 preferred

Requirements of V1, V2 and V3 series

- Constant time step, or “observation” interval
- Time step of 1, but this can be defined as a unit of some constant arbitrary-length time block:
 - 1 year
 - 1 quarter (economic data)
 - 1 second
 - 10K years
- Same time step for all series in V1, V2, V3
- Continuous-valued
- More than 30 observations, each
- Overlap of some V1 and/or V2 series (see previous slides)

Some online sources of time series

- <http://www.ngdc.noaa.gov/paleo/data.html>
(tree ring indices, reconstructions, other paleo data)
- <http://www.cefa.dri.edu/Westmap/>
(monthly and seasonal climatic data through 2010)
- <http://www.esrl.noaa.gov/psd/data/climateindices/list/>
(climate indices– SOI, PNA, etc.)
- <http://climexp.knmi.nl/start.cgi?id=someone@somewhere>
(climate data, indices)
- <http://prism.oregonstate.edu/explorer/>
(climate data)

Software Needed

Matlab

<http://softwarelicense.arizona.edu/>
(Student Software → Matlab)

Word processor

MS Word (Windows, Mac OS)
LibreOffice (Ubuntu)

Ascii Text Editor

Notepad ++ (Windows)
SciTE (Ubuntu)

Adobe reader or equivalent

Used to annotate when grading assignments
