

## Be a Dendrochronologist

1. Label the parts of the cross section below using the words: *Pith*, *Early Wood*, *Late Wood*, & *Bark*

2. What can a tree tell us? Name two things dendrochronologists can learn from tree rings.
3. What two things affect the ring width in tree-rings?
4. Pretend you are a tree. Draw your cross section, using your age to represent the annual rings.
