

A hand-drawn bar chart on millimeter paper. The horizontal axis (x-axis) is labeled with age groups: 0, 10, 20, 30, 40, 50, 60, 70, 80, 90, 100. The vertical axis (y-axis) is labeled with numerical values: 0, 200, 400, 600, 800, 1000, 1200, 1400, 1600, 1800, 2000. Each bar represents the number of people in a specific age group. The distribution is roughly bell-shaped, starting at 0 for age 0, rising to a peak of approximately 1700 for the 20-30 age group, and then gradually decreasing to 0 for the 100 age group.

Age Group	Number of People
0	0
10	100
20	1700
30	1700
40	1600
50	1500
60	1400
70	1300
80	1200
90	1100
100	0
